

# Savings Goals Planner

Educational template · 2 pages · Organize multiple family goals with clarity

## STEP 1 · DEFINE YOUR GOALS (UP TO 6)

A clear goal includes both an amount and a date. For example, instead of 'House', consider 'Down payment of \$40,000 by May 2028.' Specific goals are easier to plan for and track.

| # | Goal | Amount (\$) | Target date | Priority (1-5) |
|---|------|-------------|-------------|----------------|
| 1 |      | \$          |             |                |
| 2 |      | \$          |             |                |
| 3 |      | \$          |             |                |
| 4 |      | \$          |             |                |
| 5 |      | \$          |             |                |
| 6 |      | \$          |             |                |

## STEP 2 · CALCULATE MONTHLY CONTRIBUTION FOR EACH

A helpful formula: (Amount – already saved) ÷ months until target date = estimated monthly contribution.

| # | Goal (from Step 1) | Amount | Already saved | Months left | Monthly / mo |
|---|--------------------|--------|---------------|-------------|--------------|
| 1 |                    | \$     | \$            |             | \$           |
| 2 |                    | \$     | \$            |             | \$           |
| 3 |                    | \$     | \$            |             | \$           |
| 4 |                    | \$     | \$            |             | \$           |
| 5 |                    | \$     | \$            |             | \$           |
| 6 |                    | \$     | \$            |             | \$           |

STEP 3 · PRIORITIZE & ADJUST

Sum all monthly contributions and compare with the savings available in your budget (for example, the 20% from the 50/30/20 framework). If it doesn't fit, you can adjust amounts, extend dates, or prioritize the goals that matter most.

Sum of all monthly contributions

Available savings in your budget

Difference (positive = manageable, negative = consider adjusting)

Goal you might delay or redefine

New date for that goal

WHAT ARE SINKING FUNDS?

A sinking fund is a separate savings account for a specific goal. For example, instead of paying \$1,200 in holiday gifts in December on a credit card, you might set aside \$100/mo starting in February. This strategy can apply to vacations, gifts, vehicle maintenance, and other planned expenses.

Many families choose a high-yield savings account (HYSA) with sub-accounts (some examples: Ally, Marcus, Capital One) or one sub-account per goal.

**NEXT STEP** · Consider setting up automatic monthly transfers to your HYSA for each goal. Automation helps maintain consistency without monthly effort.
